## Who I am

Hi, I'm Robson Marques Fonseca a.k.a. Talbone, a freelance game artist since 2013, having developed various titles ranging from mobile to consoles and PC, some of which are award winning.

My core skills go from visdev to asset creation and implementation, as well as art direction and tech art. I have worked with various art styles and restrictions in the past, both 2D and 3D, and have an affinity with low-spec art, such as low poly and pixel art.

I can speak fluent english and my native tongue is portuguese, and some of my special powers include being super friendly, engaged, proactive and out-of-the-box-thinking.

## My work experience
